SUMMARY

Autonomous and creative, with technical expertise and product experience.
Proficient with managing complex end-to-end projects, I combine an innovative mindset and a strong sense of teamwork to bring projects to life that I take pride in. I have a particular appreciation for well-crafted interfaces providing a smooth user experience.

EXPERIENCE

Founder   October 2023 • France

- Designed and developed responsive isomorphic mobile and web applications.
- Architected and developed a scalable GraphQL API with MongoDB.
- Implemented multi-platfrom CI/CD pipelines.
- Collaborated with cross-functional stakeholders, including a fitness coach.
- Created a business plan and conducted market analysis.
- Defined and drove both short and long-term commercialization strategies.
- Collected user feedback on pricing, refining the product-market fit.

Product Engineer `Amblea`   January - July 2023 • Paris, France
Lead Software Engineer   January 2020 - December 2022 • Paris, France

- Designed and delivered end-to-end features.
- Developed and maintained automated tests (unit, integration, and regression).
- Collaborated with product and commercial teams to define technical specification.
- Led feature development from design to deployment.
- Proactively handled incidents and migrations.
- Managed version deployments, monitoring and post-release stability.
- Contributed to development best practices.
- Actively participated in code reviews.

Software Engineer `Boxy`   June 2019 - January 2020 • Paris Area, France

- Chose the client-side tech stack.
- Independently created a cohesive graphic identity to strengthen brand consistency.
- Delivered the app with a focus on supporting €5M fundraising goals.
- Designed a lightweight web application for a live demo with a major retailer.
- Implemented a continuous deployment process for iOS and Android.
- Developed mobile-focused tests and recruitment interviews.

Software Engineer `WINAMAX`   February 2018 - June 2019 • Paris, France

- Developed the first bet combinator in the French market.
- Implemented the graphical redesign of odds to support expansion into the Spanish market.
- Collaborated with UI/UX teams to evolve and refine designs.
- Supervised three interns over a semester, providing guidance and mentorship.

EDUCATION

Engineering Degree `EPITA`   2018 • Paris Area, France
