PROFESSIONAL SUMMARY

Full Stack Engineer with extensive experience in designing and developing responsive mobile and web applications. Successfully architected scalable GraphQL APIs and implemented multi-platform CI/CD pipelines. Proven ability to lead end-to-end feature development and collaborate with cross-functional teams to enhance user experience. Eager to leverage technical expertise and innovative mindset to drive impactful projects.

WORK EXPERIENCE

Technical Lead (Founder) *Fitness Tracker*
Oct 2023 - Apr 2025 • France

- Designed and developed responsive isomorphic mobile and web applications, enhancing user experience and engagement
- Architected and developed a scalable GraphQL API with MongoDB, which improved data retrieval efficiency and supported increased user traffic
- Implemented multi-platform CI/CD pipelines, reducing deployment time and increasing development efficiency
- Collaborated with cross-functional stakeholders, including a fitness coach, to align product features with user needs, enhancing product relevance
- Created a business plan and conducted market analysis, identifying key growth opportunities and guiding strategic decisions
- Defined and drove both short and long-term commercialization strategies, leading to improved market penetration and increased revenue
- Collected user feedback on pricing and refined the product-market fit, resulting in enhanced customer satisfaction and increased sales

Full Stack Engineer & Product Engineer Amblea *Medical Transport Platform*
Jan 2020 - Jul 2023 • Paris, France

- Led feature development from design to deployment using React, Next.js, and GraphQL, resulting in faster release cycles, improved application scalability, and enhanced user experience.
- Developed and maintained automated tests (unit, integration, and regression) using Jest, Cypress, and Typescript, ensuring high code quality and reducing bugs
- Collaborated with product and commercial teams to define technical specifications, ensuring alignment with business goals and improving project outcomes
- Managed version deployments, monitored systems, and ensured post-release stability, leading to a 20% reduction in downtime
- Handled incidents and migrations proactively, minimizing downtime and ensuring seamless transitions for users
- Developed and implemented best practices for React Native and Typescript, improving code quality and team efficiency
- Participated in code reviews, providing feedback that enhanced code quality and reduced bugs by 15%
- Contributed to development best practices by implementing React and Typescript standards, enhancing code quality and team efficiency
- Designed and delivered end-to-end features, improving user engagement and system performance

Frontend Engineer Boxy *Smart Grocery Startup*
Jun 2019 - Jan 2020 • Paris Area, France

- Selected the client-side tech stack using React and Typescript, enhancing development efficiency and project scalability
- Created a cohesive graphic identity using React Native, which strengthened brand consistency and improved user engagement
- Delivered the app with a focus on supporting €5M fundraising goals.
- Designed a lightweight web application for a live demo with a major retailer, showcasing product features and enhancing potential partnership opportunities
- Implemented a continuous deployment process for iOS and Android, reducing deployment time and increasing app reliability
- Developed mobile-focused tests and recruitment interviews using React Native, enhancing the hiring process by ensuring candidates' skills matched project requirements

Frontend Engineer WINAMAX *Sports Betting Platform*
Feb 2018 - Jun 2019 • Paris, France

- Developed the first bet combinator in the French market, enhancing user engagement and increasing betting options
- Implemented the graphical redesign of odds to support expansion into the Spanish market, improving user interface and market reach
- Collaborated with UI/UX teams to evolve and refine designs, resulting in a more intuitive user experience and increased user satisfaction
- Supervised three interns over a semester, providing guidance and mentorship, which led to successful project completions and skill development

SKILLS

Languages	Typescript • JavaScript • HTML • CSS • SQL (MySQL & PostgreSQL)
Technologies	React • Next.js • React Native • Node.js • GraphQL • MongoDB
Tools	CI/CD • REST APIs • Cypress • Jest • Automated Testing • Version Control
Practices	Web Development • Frontend Development • UX Design • UI Design • Product Design • Code Reviews • Incident Management • Migrations • Market Analysis • Commercialization Strategies

EDUCATION

Engineering Degree EPITA Sep 2013 - Jul 2018 • Paris, France

LANGUAGES

Native French • *TEF Canada C2*
Fluent English • *IELTS C1*
